1 Introduction

The purpose of this manual is to assist with the installation and operation of the Daktronics GameDay Baseball application.

The manual includes the following main sections:

- **Introduction** covers the basic information about the program and this manual. Take time to read the introduction as it defines terms and explains concepts used throughout the manual.
- **Installation** describes the software installation procedures.
- **Operation** details the specific operation of the application.
- **Appendix** contains supplemental information about or for the application.

Software Overview

The GameDay Baseball application downloads and converts season statistics from Major League Baseball® Advanced Media (MLBAM) and season/career statistics from the Elias Sports Bureau (ESB) into formats used by Daktronics display controllers. GameDay Baseball is used in conjunction with DakStats Baseball to provide users with the latest season stats and rosters for each game.

Major Features

The major features of the GameDay Baseball application are listed below:

- Downloads team rosters and season stats from MLBAM
- Downloads standings and leaders from MLBAM
- Downloads situational stats from the ESB
- Converts all data into a database useable by Daktronics display controllers through the Daktronics Scoring-Timing Interface (DSTI)
- Converts data from ESB that can be used to update in-game situational statistics
- Integration with DakStats Baseball for up-to-date rosters and season stats when setting up seasons and new games

Software Requirements

- Microsoft Windows® XP/Vista/7 or higher Operating System
- CPU and RAM must at least be equal to minimum requirements of operating system
- Internet connection for automatic downloads
- Additional serial ports or networking may be needed based on interface requirements

The GameDay Baseball application will typically be loaded onto a computer system that already contains other Daktronics software, such as the main display control computer.

Software Conventions

This manual contains the following software conventions and terminology:

Bold	Indicates an item that requires direct action, such as clicking, pressing, selecting, or formatting. Also used for reference items within the manual, such as figures or sections, as well as other documents and notes.
<i>Italics</i>	Indicates onscreen text or labels that are not clickable.
[Brackets]	Represents a keyboard key that needs to be pressed.
"Quotes"	Text or commands that may be typed. Quotes also indicate folder names.
Click	Press and release the left mouse button.
Double-click	Press and release the left mouse button twice.
Right-click	Press and release the right mouse button.
Select	Highlight or mark, such as by placing a check mark in a nearby box; clicking will not necessarily perform an action.
>	Followed by (example: File > Open).

2 Installation

Downloading from the Internet

1. Download the GameDay Baseball program.
 - a. Open an Internet browser and go to http://dakfiles.daktronics.com/downloads/Sports_Products/GameDay%20Baseball/
 - b. Click on the “GameDayBaseballInstall.exe” file.
 - c. In the window that appears, click **Run**. If an additional window opens, click **Run** once more.
2. Follow the on-screen instructions.
3. Click **Finish** when done.
4. Double-click the desktop icon (**Figure 1**) to open the program.*

Figure 1: Icon

***Note for Windows 7 users:** In order to properly open and register the program, it is necessary to right-click the desktop icon and select **Run as administrator**. Once the program is registered, it may be opened simply by double-clicking the icon.

Registering the Software

When the GameDay Baseball application is first opened, a new software license (**Figure 2**) must be obtained in order for the program to work.

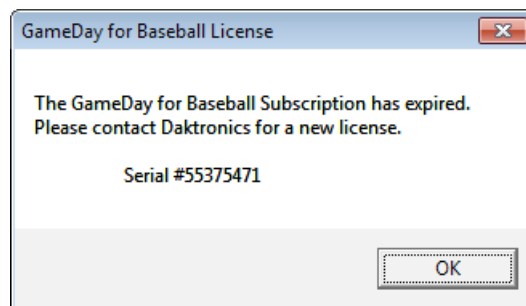

Figure 2: License Screen

1. Email the *Serial Number* to professionalservices@daktronics.com and a license file will be emailed back upon proof of payment.
2. Save the license file to “C:\Program Files\Daktronics\GameDay Baseball” (or “C:\Program Files (x86)\Daktronics\GameDay Baseball” for Windows 7)

Note: Without a subscription, the application will not start. If using Windows 7, the program will start without registration; however, until it is running as an administrator and registered, the program will be locked to downloading and converting season stats only.

3 Operation

Operation of the GameDay Baseball program is streamlined by using XML files from MLB.com and Elias Sports Bureau (ESB). Once a season has been properly configured, the entire pregame download process can be completed with a click of a button.

This section of the manual on program operation is broken into seven main sections:

- Creating a New MLB Season in DakStats
- GameDay Baseball User Interface
- GameDay Baseball Configuration
- Setting Up Today's Game
- Manual Download Procedure
- All Star Games
- Postseason Stats

Creating a New MLB Season in DakStats

Before beginning, there must be at least one season set up in DakStats Baseball.

Note: If the current season has already been created, skip ahead to the next section.

1. In DakStats Baseball, go to **Configure > Season and System Preferences (Figure 3)**.
2. On the **Seasons** tab, click **Add**, and the New Season window will appear (**Figure 4**).
3. Type in a descriptive *Season Title*.
4. Select the *Default Play Entry Mode*:
 - **Play-By-Play: Simple mode** offers the most detailed way to enter descriptions of plays as they happen.
 - **Box score: Inning by Inning** keeps track of scoring and stats for each inning.
 - **Box score: Game Total** shows the running totals of scores and stats in the game.
5. Set the *Rules File* to "**Rules_MLB.ini**", and set the *Default Gender* to **Male**.
6. Click **OK**, and then click **Yes**.
7. The *GameDay Baseball Configuration* window will appear (**Figure 6**). Select the desired *League*, *Team*, and *Opponent (Automatic)*. Refer to **GameDay Baseball Configuration (p.6)**.
8. Click **OK** to exit the *GameDay Baseball Configuration* window.
9. Click **OK** to exit the *System Preferences* window.

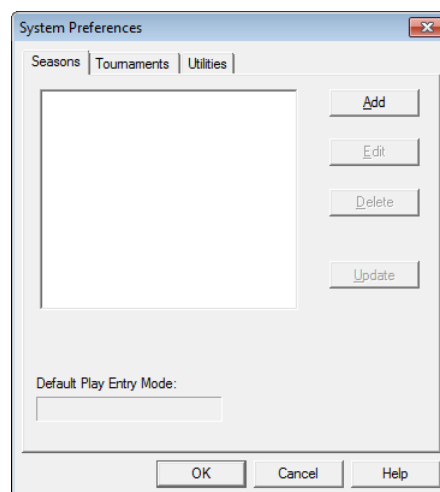

Figure 3: DakStats Season Preferences

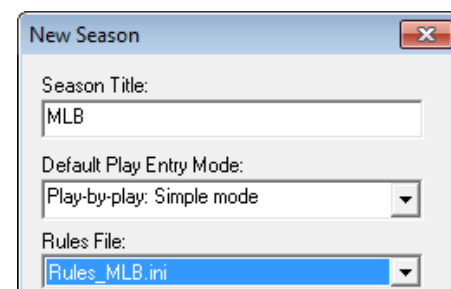

Figure 4: DakStats New Season

Note: When GameDay Baseball is opened, it will default to the last season that was created in DakStats. To change the season, refer to **GameDay Baseball Configuration (p.6)**.

GameDay Baseball User Interface

The GameDay Baseball user interface displays the status of downloading and converting the files of necessary game information (**Figure 5**). The converted files are then stored in a common folder to be used by the Daktronics Scoring-Timing Interface (DSTI), DakStats Baseball, and StatVision.

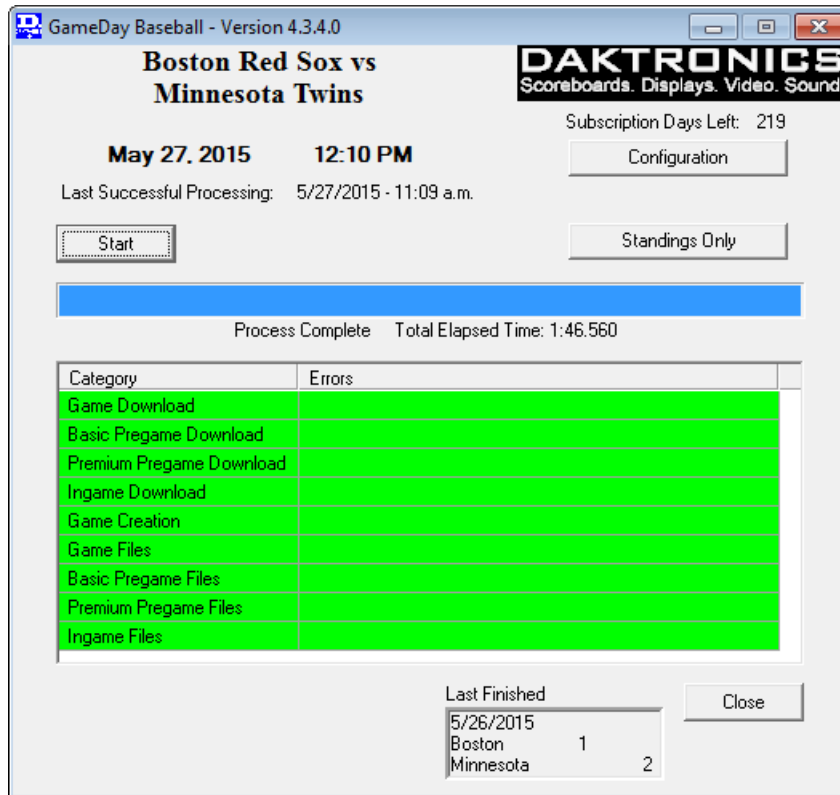

Figure 5: Main Application Screen

The main application screen contains the following buttons and information:

- The **Start** button is used to begin the download and file conversion process.
- The **Standings Only** button is used to just download standings and leaders, so that they may be updated more often without overwriting any current game stats.

Note: The **Start** and **Standings Only** buttons are disabled if no game is scheduled for the day or if no season is set up. After the download and conversion process begins, the buttons will say **Cancel**, and the process may be stopped by clicking them.

- The **Configuration** button opens a window to adjust several options related to team, league, and season selection as well as how to set up the download process. Refer to **GameDay Baseball Configuration (p.6)**.
- The **Close** button immediately exits the program.

Category

- *Game Creation* shows the status of setting up a new game within DakStats Baseball. Refer to **Setting Up Today's Game (p.9)**.
- *Game Download* shows the status of downloading the rosters and season stats for both teams.

- *Basic Pregame Download* shows the status of downloading the standings and leaders from MLB.com.
- *Premium Pregame Download* shows the status of downloading standings and leaders as well as Hot/Not's, matchups, and schedules from ESB.
- *Ingame Download* shows the status of downloading situational stats for every player on both teams.
- *Game Files* shows the status of converting the roster and season stat files.
- *Basic Pregame Files* shows the status of converting the standings and leaders files from MLB.com.
- *Premium Pregame Files* shows the status of converting the standings, leaders, and additional pregame content files from ESB.
- *Ingame Files* shows the status of converting the situational stat files.

Errors

- If any errors occur in the above processes, the *Category* will turn red and a message will appear in the *Errors* column. If a game is created for a date other than the current calendar date, the *Errors* column will display a message stating so, and the *Game Creation* list item will turn yellow.
- When GameDay Baseball first opens, it will check to see if there are any scheduled games that day for the most recently changed team and season.
 - If no game is found, a message will appear stating *Failed to get today's game*.
 - If a game is found, the teams playing, the date, and the game time will be visible on the main application screen.

Note: Games may be created for other dates by clicking the **Date Change** button on the **Communication** tab of the *GameDay Baseball Configuration* window. Refer to **GameDay Baseball Configuration (p.6)**.

- *Subscription Days Left* shows the number of days remaining before the current license subscription expires.
- *Last Successful Processing* shows the last time the files have been downloaded and converted.
- *Last Finished Game* shows the date and scores of the last completed game found for the chosen team; used to verify the files are up-to-date and ready for download.

GameDay Baseball Configuration

The *GameDay Baseball Configuration* (**Figure 6**) may be accessed within GameDay Baseball itself and via DakStats Baseball.

To access the configuration within GameDay Baseball:

1. Open the GameDay Baseball application.
2. On the main application screen, click **Configuration** to open the *GameDay Baseball Configuration* window.

To access the configuration via DakStats Baseball:

1. Open the DakStats Baseball application.
2. Go to **Configure > Season and System Preferences**.
3. Select a *Season* that needs modification, and then click **Edit**.
4. Be sure to set the *Rules File* to "**Rules_MLB.ini**", and then click **OK** to open the *GameDay Baseball Configuration* window.

Team Tab

Use the Team tab (**Figure 6**) to select the desired team stats to download.

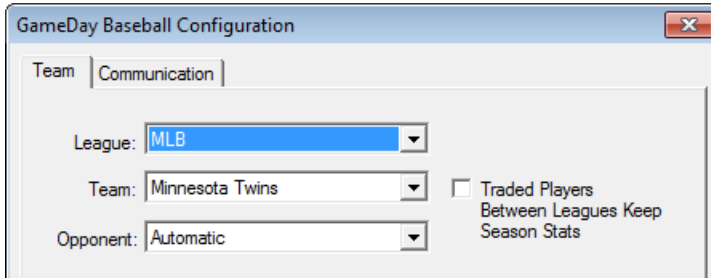

Figure 6: GameDay Baseball Configuration - Team Tab

Select the appropriate *League*, and be sure to select the home team in the *Team* drop-down list. Leave *Opponent* set to **Automatic**.

MLB ONLY: By default, traded players *between* leagues (AL & NL) will have their season stats reset and only include stats in their new league. To allow players to retain all their season stats across both leagues, check the box marked **Traded Players Between Leagues Keep Season Stats**.

Note: If a league other than **MLB** is selected, a checkbox will appear (**Figure 7**) to allow downloading of MLB Standings/Leaders for affiliated teams.

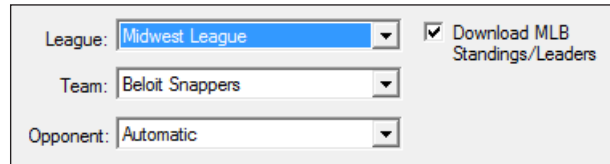

Figure 7: Download MLB Standings/Leaders

It is possible to select any other team within the league for the *Opponent* if the wrong opposing team has been set in the schedule. The next time GameDay Baseball is opened, *Opponent* will be back on **Automatic** so the schedule can be followed.

When the *Opponent* team is selected manually, a *Game Type* field will appear (**Figure 8**). Select between **Post-Season** or **Regular Season** stats as needed.

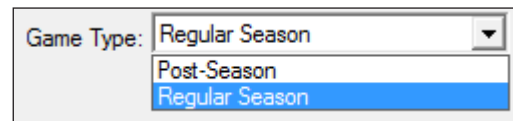

Figure 8: Game Type

Communication Tab

Use the **Communication** tab (**Figure 9**) to configure options for the download process.

Season: This will be the season in which new games are created. Click the drop-down list to select a different season if applicable.

Date Change: Use this function to download information using teams for a game from a date other than the current calendar day.

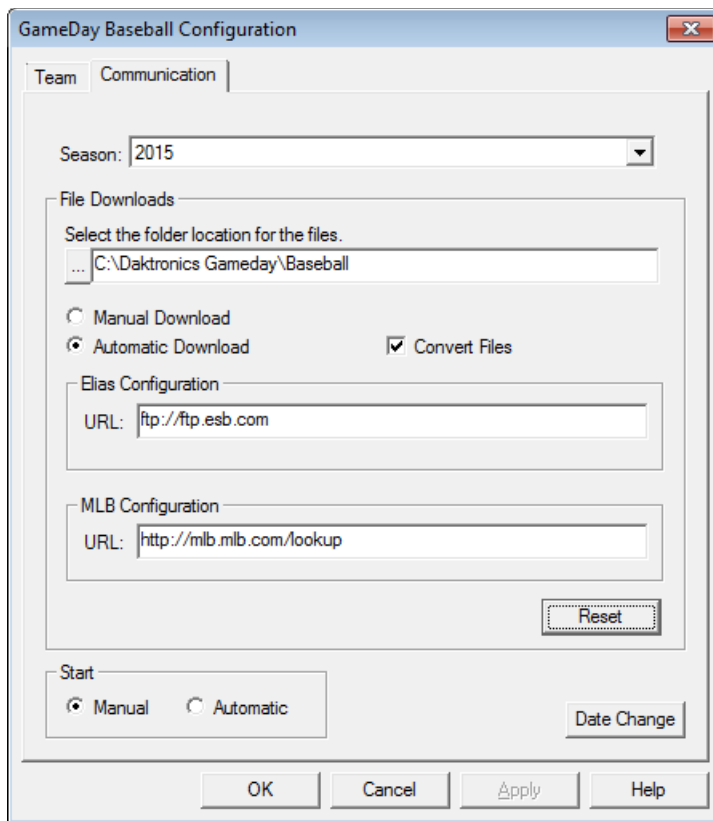

Figure 9: GameDay Baseball Configuration - Communication Tab

File Downloads

- *Select the folder location for the files:* Here it is possible to change the destination of the downloaded files. It is recommended to keep the default location.
- *Manual Download/Automatic Download:* Switch these settings if GameDay Baseball is not on the same computer as DakStats Baseball. Refer to **Manual Download (p.9)**.
- *Convert Files:* Uncheck the box if GameDay Baseball is not on the same computer as DakStats Baseball. Refer to **Manual Download (p.9)**.
- *Elias Configuration URL:* This is the site to which GameDay Baseball connects for downloading the ESB files.
- *MLB Configuration URL:* This is the site to which GameDay Baseball connects for downloading the MLB files.
- **Reset:** Returns the Elias and MLB Configuration URLs to the default addresses.

Start

- *Manual:* With **Manual** selected, the **Start** button on the main application screen must be clicked to begin the downloading and converting processes (default).
- *Automatic:* With **Automatic** selected, the downloading and converting processes will begin as soon as GameDay Baseball is opened and that day's game is found.

Setting Up Today's Game

The following procedure may be used if one computer has a working Internet connection and both GameDay Baseball and DakStats Baseball installed. See **Manual Download (p.9)** if downloaded files must be transferred to a computer that has no Internet access.

Once the season setup and configurations are correct:

1. Click the **Start** button on the main application screen of GameDay Baseball.
2. Allow the files to be downloaded and converted. Click the **Start** button to try again if any download fails.
3. Click **Close**.
4. Open DakStats Baseball if it is not already open.
5. Select the current *Season*, and two games will be available in the *Schedule* (**Figure 10**).
6. Double-click the Pbp (play-by-play) game to start it with the latest rosters and stats.

Note: The Box Total game is a collection of the current season stats. This game is overwritten and updated with the latest stats after each download. It is not necessary to open the Box Total game; if any stats are incorrect, they may be modified by right-clicking on the player in the roster of an open Pbp game.

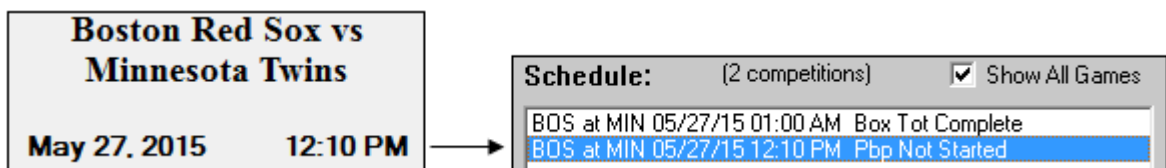

Figure 10: Today's Game Setup

Manual Download

The following manual download procedure is required if the computer with DakStats Baseball does not have Internet access, but another computer does. In this instance, GameDay Baseball must be installed on two computers, with one version of the program to download the files and an additional copy of the program to convert the files.

Setup on Internet Computer

1. Open GameDay Baseball and click **Configuration**.
2. On the **Team** tab, make sure the *League* and *Team* are correct.
3. On the **Communication** tab, uncheck **Convert Files**, and then click **OK**.
4. The default location under *Select the folder location for the files* is "C:\Daktronics GameDay\Baseball". The files that are downloaded to this folder must be transferred to the DakStats computer.

If applicable, this location may be set to write to the path of a folder on a USB flash memory drive to make the transfer quicker and easier.

Note: Click **OK** when any messages appear stating *the DakStats database isn't open or Failed to set the season*. GameDay Baseball still downloads files without setting up a season.

Setup on DakStats Computer

1. Open GameDay Baseball and click **Configuration**.
2. On the **Communication** tab, select **Manual Download**, and then click **OK**.
3. The default location under *Select the folder location for the files* is "C:\Daktronics GameDay\Baseball". This folder is where the downloaded files must be placed.

If applicable, this location may be set to read from the same location on a USB flash drive where the files have been downloaded. Be sure that both computers use the same drive letter for the USB flash memory drive.

Manual Download Procedure

1. On the Internet computer, open GameDay Baseball, and the software will download the information about today's game from the Internet.

Note: The *Errors* column of the main application screen will lock out any columns pertaining to file conversion and game creation (**Figure 11**).

Category	Errors
Game Download	
Basic Pregame Download	
Premium Pregame Download	
Ingame Download	
Game Creation	LOCKED
Game Files	LOCKED
Basic Pregame Files	LOCKED
Premium Pregame Files	LOCKED
Ingame Files	LOCKED

Figure 11: File Conversions Locked

2. Click the **Start** button to download the various data files. If any download fails, try again.
3. Once the downloads are complete, Copy all the files from the download directory to a USB flash memory drive (Figure 12).
4. On the computer with DakStats Baseball, Paste all the copied files into the download directory ("C:\Daktronics GameDay\Baseball" is the default).
5. Open GameDay Baseball on the DakStats computer.

Note: The *Errors* column of the main application screen will lock out any columns pertaining to file downloads (**Figure 12**).

Category	Errors
Game Download	LOCKED
Basic Pregame Download	LOCKED
Premium Pregame Download	LOCKED
Ingame Download	LOCKED
Game Creation	
Game Files	
Basic Pregame Files	
Premium Pregame Files	
Ingame Files	

Figure 12: File Downloads Locked

6. Click the **Start** button, and GameDay Baseball will convert the files that were downloaded on the other computer.
7. Once the conversions are complete, click **Close**.
8. Open DakStats.
9. Go to **File > Open Game**.
10. Select the current *Season*, and the game for that day will be available in the **Select Game** drop-down list.

All Star Games

By choosing an "All-Stars" team, the software switches to All Star Mode. To return to regular operation, simply select the home team again.

1. Click **Configuration**.
2. Select a *League*.
3. Select an all-stars *Team* for the chosen league.
4. Leave *Opponent* set to **Automatic**.
5. Click **OK** when finished.

Note: For an All Star game, the *Premium Pregame Download* and *Premium Pregame Files* categories will be disabled (**Figure 13**).

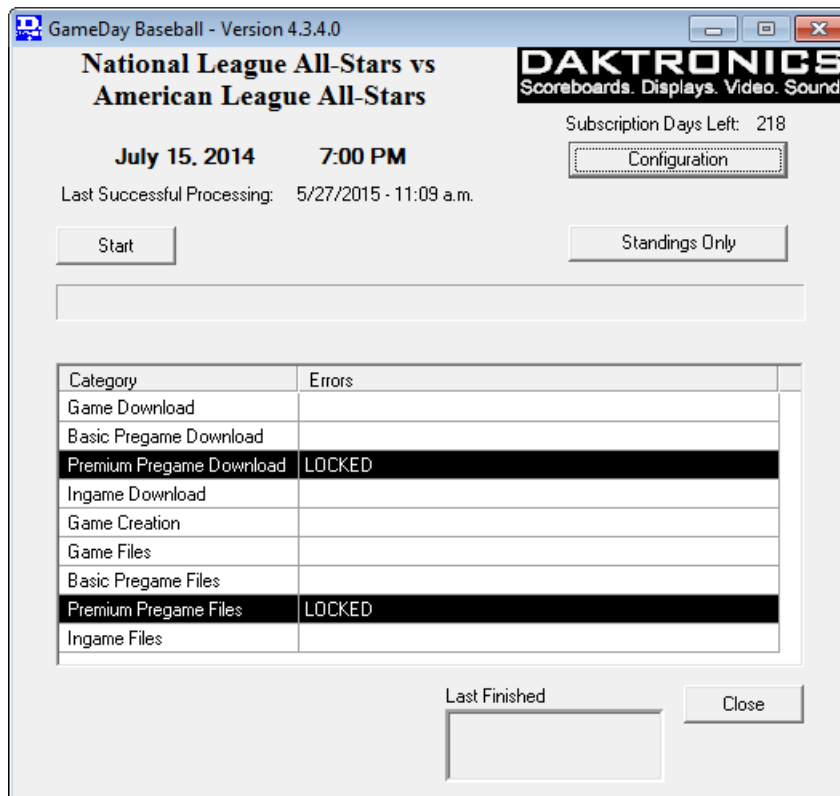

Figure 13: All Star Games

Postseason Stats

For the postseason, the operator has the option to download regular season, playoff, or current series stats for the game. The selection is done using the drop-down box next to the Start button (**Figure 14**).

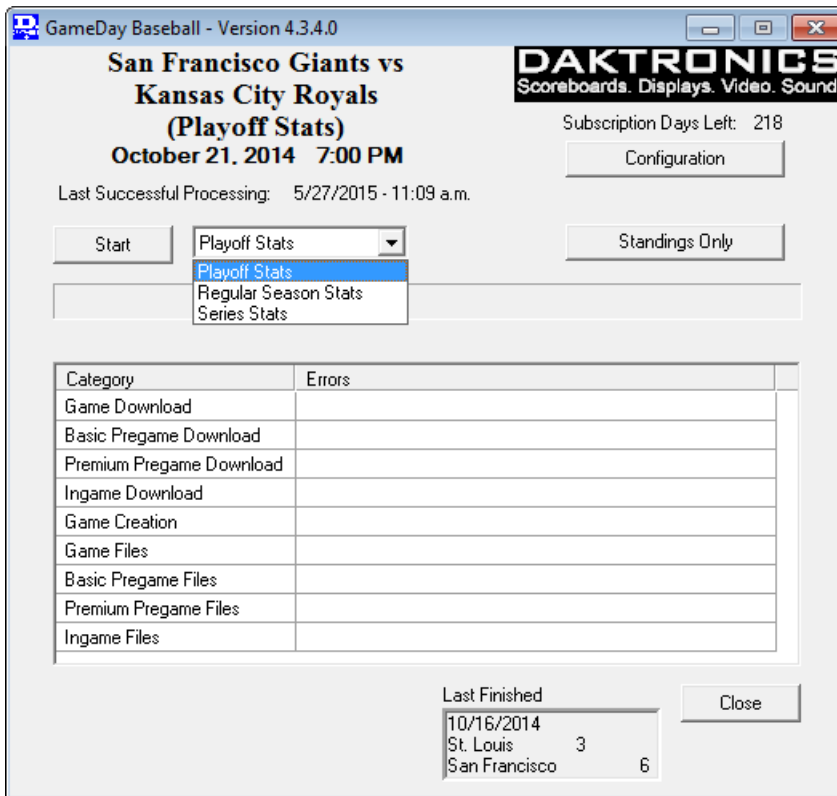

Figure 14: Postseason Stats

Choose from **Playoff Stats**, **Regular Season Stats**, or **Series Stats**, and then click **Start**.

Note: The **Regular Season Stats** option can be used for the first game of the playoffs to keep the stats from being all zeros. With this option selected, new stats entered during playoff games will NOT be updated.

Batter Vs. Pitcher

nnpp Batter-vs.-Pitcher Matchups ('pp' = pitcher's uniform number)
 To prevent Batter-vs.-Pitcher graphics from overwriting more useful lower-thirds: For pitchers with uniform numbers of 50 or higher, graphics won't be recorded for insignificant BVP matchups. Statistics for these matchups will still be included in printed and emailed reports, where they will be highlighted with asterisks.
